

Application No.: 10/749306

Case No.: 59378US002

Election

In response, Applicants elect Group I, with traverse.

Reconsideration and withdrawal or modification of the restriction requirement is respectfully requested.

In Group II, Applicants broadly claim a mill blank comprising a substantially uncured self-supporting hardenable organic composition. In Group I, Applicants broadly claim a method of working a dental appliance that involves machining the mill blank.

Applicants submit that the Groups I and II claims are so interrelated that a search of one group of claims will reveal art to the other. Moreover, the classification of Groups I and II claims in different classes and subclasses is not necessarily sufficient grounds to require restriction.

Were restriction to be effected between the claims in Groups I and II, a separate examination of the claims in Groups I and II would require substantial duplication of work on the part of the U.S. Patent and Trademark Office. Even though some additional consideration would be necessary, the scope of analysis of novelty of all the claims of Groups I and II would have to be as rigorous as when only the claims of Group I were being considered by themselves. Clearly, this duplication of effort would not be warranted where these claims of different categories are so interrelated. Further, Applicants submit that for restriction to be effected between the claims in Groups I and II, it would place an undue burden by requiring payment of a separate filing fee for examination of the nonelected claims, as well as the added costs associated with prosecuting two applications and maintaining two patents.
